Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-23, 25-27 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vrba et al.-6,120,522 in view of Foreman et al.-5,976,155.

Vrba (Fig. 1-3b; col. 3, line 60 to col. 4, lines 27) discloses a stent delivery system including sheath 170, inner shaft 122, self-expanding stent 130 having helically wrapped strands forming cells/opening 142 to receive discontinuous protrusions 186 of ring 122, handle or actuator or pull wire 185 to retract sheath 170 as recited in the claims. Except for protrusions 186 have an outside diameter at least as great as the outer diameter of mounted stent 138. However, Foreman-'155 (Fig. 2-3, for example) discloses protrusion 16 protrusions have an outside diameter at least as great as the outer diameter of mounted stent 18 for retaining stent 18. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide protrusions 186 of Vrba-'522 having an outside diameter at least as great as the outer diameter of mounted stent 130 as this configuration would provide a good retaining of the stent 138 during deployment.

Response to Arguments

Applicant's amendment with respect to claim 21 and new claim 41 has been carefully considered but are moot in view of the above ground(s) of rejection.
